- **Parametry w metodzie GET** znajdują się w **adresie URL**, po znaku zapytania ?, a kolejne oddzielane są znakiem &.
- **Parametry w metodzie GET nie są szyfrowane**, dlatego każdy może je zobaczyć w pasku adresu przeglądarki.
- **Różnica między metodą GET a POST** polega na tym, że w GET dane przesyłane są w adresie URL, natomiast w POST dane trafiają do **ciała (body)** żądania i nie są widoczne w adresie.
